15503 Futura Boulevard

Dear Mr. Grapher,

We write you this letter to inform you that Prince comes with some embedded font families:

Goodfish is a calligraphic serif font in regular, **bold**, *italic*, and ***bold italic***.

Effloresce is a delicate serif font with a hand-drawn appearance. Prince can show the regular, **bold**, *italic*, and ***bold italic*** variants.

Minya Nouvelle is a cartoon typewriter font. If you specify the "fantasy" generic font family in your style sheet, Prince will use Minya Nouvelle. The font is available in regular, **bold**, *italic*, and ***bold italic***.

Deftone Stylus is designed to look like hand-painted sign lettering. Prince may use Deftone Stylus if you specify the "cursive" generic font family.

Unispace is a decorative, squarish monospace font. Available in regular, **bold**, *italic*, and ***bold italic***.

All these wonderful fonts have been designed by Ray Larabie.

Sincerely,

Bo Doni
